- *To start the hair transplant business, we suggest you charge no more than US\$3 per graft to be competitive (the average price in USA is US\$5.50 to US\$7 per graft).*

- *If you begin to perform 1500 grafts only, it will already generate you a gross income of US\$4500 for your first patient. This implies that after only three patients, you will already have recovered your investment. Your income will increase very quickly as soon as you start performing more grafts per patient*
