

CELLUFADE

The most effective way to eliminate Cellulite “Orange peel” is through **MESOTHERAPY** .

CELLUFADE offers the most updated compounds to achieve the most effective **MESOTHERAPY** results for cellulite treatment.

MESOTHERAPY is a non invasive technique that has become very popular for skin rejuvenation .

MESOTHERAPY is a medical technique of tiny injections of antioxidants and vitamins combined with traditional medications directly into cellulite zones where even diet and exercise cannot eliminate.

The compounds that are used in **CELLUFADE** improve blood flow to the area, eliminate fibrotic hardened connective tissue, improve lymphatic drainage, which improve skin smoothing.

CELLUFADE is a mixture of Tretinoin acid, Glycolic acid, L-Carnitine, Aminophylline Rutin, Pentoxifylline, Ascorbic acid and DMAE- Dimethylethanolamine.
