

## LIPOTRIM

**LIPOTRIM** offers the right compounds to achieve the most effective results of **LIPOTHERAPY**.

**LIPOTHERAPY** is a medical technique involving injections of specific compound for melting lipodystrophic zones where diet and exercise is no longer a solution.

**LIPOTHERAPY** is a non-invasive technique that has become very popular for Non-Surgical body sculpturing.

The compounds that are used in **LIPOTRIM** increase the metabolism of fat in the area of injection which can aid in reduction of fat deposits .

**LIPOTRIM** is a mixture of PhosphatidilCholine, Deoxycholic acid, L-Carnitine ,Aminophylline and Pantothenic acid.

To obtain optimal results adding Lipo-CL2 or Collagenase is advised .
